PROFILE

I'm a developer who has built tools geared towards helping other developers. With over a decade of training experience, I use development, marketing, and training knowledge to influence code design, assist teammates, and support customers.

PROJECTS

Render Engine

Link: <https://pypi.org/project/render-engine>

Codebase: <https://github.com/kjaymiller/render-engine>

Skills:

- Full-Stack Development
- Project Management
- Python 3.7+, Jinja2, Pytest, Click, mkDocs

Synopsis:

A static site generator that uses object inheritance to build a site based on 4 fundamental objects, **Page**, **Collection** (of Pages), **Site** (Collection of Collections and Pages), and **Engine** (Templating System to Convert Objects to HTML, XML).

Used for corporate marketing microsites, prototyping, landing pages, blogs.

Transcriptor

Link: <https://pypi.org/project/transcriptor>

Codebase: <https://github.com/kjaymiller/transcriptor>

Skills:

- Project Management
- Python 3.8, Boto3

Synopsis:

An object-oriented approach to Transcriptions, Markers, and Speakers with non-destructive manipulation of alternatives and speaker_labels. Designed to create a standard schema for working with multiple transcription services with a single library.
